Our office was processing our credit cards through our Dentrix G5 Software using PowerPay and Moneris. We were approached by Retriever Medical Dental Payments. They said they had exclusive technology so that we could process with them, at lower rates, and still have the payments automatically post to our patient's ledger. They also told us that they had signature pads that would securely capture our patient's signatures. We were skeptical at first because we were told that no other company, besides Moneris, could do all of this. I am happy to report that Retriever's system works flawlessly and exactly as they promised. In fact, it is actually easier than what we had before.

Retriever's customer service has been exceptional. Our representative, Stephen Kagay, is always helpful and knowledgeable and promptly returns every call.

We are now saving on our processing fees, and we couldn't be happier.

Sincerely,
